

Case Management Opportunity with Harrison Associates

Harrison Associates provides case management and expert witness services for adults and children with major, life-changing injuries and impairments, such as brain or spinal injuries. Our case management services develop, deliver and monitor tailor-made rehabilitation plans addressing medical, therapeutic, care, social, educational, employment and housing needs in order to maximise recovery, enable participation in everyday activities and optimise quality of life.

We need to expand our current, dedicated team of both employed and freelance Case Managers. Working alongside clients, families and legal professionals, you will manage a small case-load with a huge brief to achieve excellent outcomes. Although we're always looking for Case Managers nationwide, we are currently looking for candidates from the South West, South Coast and London in particular.

HCPC/NMC etc. registered and qualified for at least 6 years, you need substantial experience of complex conditions e.g paediatric, neurological, spinal, brain or other major injury cases. You will also have a high level of verbal, written and personal presentation skills.

Harrison Associates offer full sector-leading training and mentoring; maintenance of CPD is expected and supported. Competitive remuneration and flexible working arrangements are standard.
